

# avast! Internet Security

Our new avast! Internet Security 6.0 provides comprehensive and worry-free security for individuals, home offices, and small businesses that do not have a need for central management.

Based on our award-winning 5 series, version 6.0 introduces: a native 64-bit platform for Windows 7 and Windows Vista, enabling critical boot-time scans; an improved Behavior Shield, better integrated with the antivirus scanning engine; optimized cleaning features, stability, and performance; and our new SafeZone, WebRep, and AutoSandbox (this in addition to our standard Sandbox). avast! Internet Security also adds crucial security layers that include antispam and a silent firewall.

## Key Features – avast! Internet Security

### ANTIVIRUS AND ANTI-SPYWARE ENGINE

Innovative scanning engine protects against viruses, spyware, and other malicious agents.

### **new!** BOOT-TIME SCANNER

Scans your computer for infections before the OS can start to activate any viruses beneath it (now applies also to 64-bit versions of Windows 7 and Windows Vista).

### **new!** 64-BIT SUPPORT

Supports the 64-bit architecture platforms of Windows 7 and Windows Vista.

### **new!** AUTOSANDBOX

Prompts users to run suspicious applications in the virtual Sandbox environment.

### **new!** avast! SAFEZONE

Opens a new (clean) desktop so that other applications don't see what's happening – perfect for banking, secure ordering/shopping – and leaves no traces once it's closed.

### **new!** avast! WEBREP

Provides website reliability and/or reputation ratings according to community-provided feedback.

### **improved!** SILENT FIREWALL

Stops hackers, using heuristic and behavioral analysis and a white list of safe applications.

### SYSTEM REQUIREMENTS:

Processor Pentium 3, 256 MB RAM, 380 MB of free hard disk space

Microsoft Windows XP/Vista/7 (32/64 bit)

### CERTIFICATION:

#### ANTISPAM

Comprehensive spam and phishing filter, which works as a plug-in to MS Outlook and a generic POP3/IMAP4 proxy for other email clients.

#### *improved!* BEHAVIOR SHIELD

Stops 'zero-day' threats and unknown malware before virus definitions have been obtained.

#### *improved!* WEB SHIELD

Scans all visited web pages, downloaded files, and java scripts. Thanks to the intelligent stream scanning feature, the Web Shield doesn't slow your web browsing.

#### HEURISTICS ENGINE

Proactively finds malware undetectable with normal definitions and virus signatures.

#### REAL-TIME ANTI-ROOTKIT PROTECTION

Prevents stealth malware (rootkits) that, when loaded by the computer's OS, are invisible to ordinary scanners.

#### avast! SANDBOX

Provides an extra layer of security for you to run your PC and its applications in a virtual environment – where any attacks are thus targeted (instead of your real PC).

#### FILE SYSTEM SHIELD

Real-time scanning of opened/executed files.

#### MAIL SHIELD

Scans all incoming/outgoing email for malware (a special plug-in is used for MS Outlook).

#### P2P SHIELD/IM SHIELD

Checks files downloaded via P2P programs and while using IM or "chat" programs.

#### NETWORK SHIELD

Protects against network-based viruses with two main components: a URL blocker, to block malicious URLs, and a lightweight intrusion-detection system.

#### SCRIPT SHIELD

Detects malicious scripts hidden in web pages and prevents them from hijacking and potentially damaging your computer.

#### avast! COMMUNITY IQ

Provides the best, most up-to-date signature-based detection because the global avast! user community provides samples of new viruses.

#### COMMAND-LINE SCANNER

Runs a scan directly from the command line.

#### WAKE-UP/SCHEDULED SCANNING

Schedule scanning at night or whenever you don't need to use your PC.

#### INTELLIGENT SCANNER

Reduces the number of required file scans up to 80% through a white list of safe applications. Files identified as safe are not rescanned unless they change.

#### SILENT/GAMING MODE

Automatically detects full-screen applications and disables pop-ups and other notifications without compromising security.

#### GREEN COMPUTING

Leaves a minimal "footprint" due to its efficient and effective technology.

#### MULTI-THREADED SCANNING OPTIMIZATION

Allows the splitting of large files between cores, which accelerates the scanning process on new multi-core CPUs and makes avast! run even faster.

#### AUTOMATIC PROCESSING

Infected files are processed automatically, without requiring user instructions.

#### CODE EMULATOR

Uses dynamic translation (a method much faster than traditional emulation) for both generic unpacking and within the heuristics engine.

#### SMART VIRUS DEFINITION UPDATES

Incremental updating minimizes the size of regular update files.

#### FAST APPLICATION OF UPDATES

New format for the virus definition file means faster updates and reduces demand on CPU/memory, for uninterrupted computing.
